# RICOH EZ Charger Suite

Your accounting solution to efficient print budgeting.

- ✓ Reduce wastage
- ✓ Cost control
- ✓ Eliminates disputes
- ✓ Accurate reports
- ✓ Unobtrusive training

# What is EZ Charger Suite?

Ricoh helps you rein in cost of printing with its effective print budgeting system.

## Benefits

### Reduce wastage

Ability to control user usage (through quota settings) ensures there is accountability. Users have the ability to select or delete print jobs on the device itself.

### Cost control

Gives administrators options, such as creating a running tab for monitoring or charge-back purposes, or for implementing a quota system to limit MFP resources.

### Eliminates disputes

Disputes over document reproduction expenses can be resolved with detailed cost tracking, preventing any miscommunication.

### Accurate reports

Replaces the need for manually tracking document production costs, and reflect the true cost of printing.

### Unobtrusive training

Minimal training required allows for workflow to be unaffected even after system is in place.

## 1 Scalable solution to match your needs

## 2 Easy to Manage

## 3 Intuitive and easy to use

## 4 Security

Manage multiple MFPs at the same time, regardless of whether there is a server infrastructure in the office, thus lightening the workload of IT support staffs.

Manage operational cost by simply specifying a quota for each MFP or user, and also, generate detailed reports for chargeback purposes, all these through web browser based administration.

Clear display of printing options and budget summaries. A quick touch to initiate print, copy or scan. Send print/scan to mobile devices too.

Increase the security of print environment through a simple, fast and secure 'swipe-and-go' card authentication, mobile authentication (handshake), pattern lock, or manual.
